

## ENA 8

# small, stunning, simple – freshly ground, not capsuled

Only 27.1 cm wide, 32.3 cm high and 44.5 cm deep – this one-cup machine will comfortably fit anywhere. A particular highlight of the design is the round water tank. Its pattern combined with its cylindrical shape is inspired by premium crystal carafes. The front 2.8" TFT display and the clearly defined operating panels make it extremely easy to use. RFID technology detects whether the new CLARIS Smart mini (30-litre capacity) or CLARIS Smart (50-litre capacity) is being used and adapts the settings automatically. The best result in the cup, freshly ground and freshly extracted every time, just the way you like it – these are the defining qualities of the ENA 8. Ten different specialities are available at the touch of a button. The first VC compact brewing unit ensures that the coffee always flows into the cup under ideal conditions. The Pulse Extraction Process (P.E.P.®) optimises the aroma of a short ristretto or espresso. Fine foam technology creates airy, feather-light milk foam for cappuccino or other specialities.

## Massive Aluminium

Traditional craftsmanship combined with state-of-the-art production technology creates workpieces of the highest precision. The result is the world's first automatic speciality coffee machine with a solid 3-millimetre-thick aluminium housing.

## Benefits at a glance

- Measures just 27.1 × 32.3 × 44.5 cm
- Stunning all-round design and cylindrical water tank
- Easy to use via TFT display and operating panels
- 10 specialities at the touch of a button – freshly ground, not capsuled
