Wherever customers, staff and visitors can enjoy superlative coffee, the atmosphere is relaxed, communicative and productive. Coffee frees the mind and stimulates creativity. It follows that no workplace should be without it. The new WE6 expertly prepares the full range of coffee classics from ristretto and espresso to café crème. A water tank with a 3-litre holding capacity, a bean container for 500 grams of coffee beans and a coffee grounds container with a capacity of 25 portions make the elegant professional coffee machine the ideal solution for locations where around 30 speciality coffees are consumed per day. Innovative technologies revolutionise the enjoyment of coffee. Buttons on the front of the machine and a modern 2.8" colour display make operation incredibly simple even for inexperienced users. The switch for hot water and steam preparation was redesigned over and over again to take current ergonomic aspects into account until it was just right for every single tester. For some, this might be a small thing, but for us it is a further step towards perfection.
